

2017 年 12 月大学英语四级考试真题（第 3 套）

为了让大家更好的模拟真实考试场景，完全按照真题卷面顺序排版了本套测试题，Part I 写作部分被放在了试卷的最后一页，与听力部分完全隔开，请大家在备考过程中提早适应卷面顺序，熟悉题型，新东方在线伴你高分过级！

Part III Reading Comprehension (40 minutes)

Section A

Directions: In this section, there is a passage with ten blanks. You are required to select one word for each blank from a list of choices given in a word bank following the passage. Read the passage through carefully before making your choices. Each choice in the bank is identified by a letter. Please mark the corresponding letter for each item on Answer Sheet 2 with a single line through the center. You may not use any of the words in the bank more than once.

Questions 26 to 35 are based on the following passage.

Technological changes brought dramatic new options to Americans living in the 1990s. During this decade new forms of entertainment, commerce, research, and communication became commonplace in the U.S. The driving force behind much of this change was a(n) 26 popularly known as the Internet.

The Internet was developed during the 1970s by the Department of Defense. In the case of an attack, military advisers suggested the 27 of being able to operate one computer from another terminal. In the early days, the Internet was used mainly by scientists to communicate with other scientists. The Internet 28 under government control until 1984.

One early problem faced by Internet users was a speed. Phone lines could only transmit information at a 29 rate. The development of fiber-optic (光纤) cables allowed for billions of bits of information to be received every minute. Companies like Intel developed faster microprocessors, so personal computers could process the 30 signals at a more rapid speed.

In the early 1990s, the World Wide Web was developed, in large part, for 31 purposes. Corporations created home pages where they could place text and graphics to sell products. Soon airline tickets, hotel 32, and even cars and homes could be purchased online. Universities 33 research data on the Internet, so students could find 34 information without leaving their dormitories. Companies soon discovered that work could be done at home and 35 online, so a whole new class of telecommuters began to earn a living from home offices unshaven and wearing pajamas(睡衣).

A) advantage	E) incoming	I) maintained	M) reservations
B) commercial	F) innovation	J) occupations	N) submitted
C) conversation	G) limited	K) posted	O) valuable

D) equipped

H) local

L) remained

Section B

Directions: In this section, you are going to read a passage with ten statements attached to it. Each statement contains information given in one of the paragraphs. Identify the paragraph from which the information is derived. You may choose a paragraph more than once. Each paragraph is marked with a letter. Answer the question by marking the corresponding letter on Answer Sheet 2.

The Health Benefits of Knitting

- A) About 15 years ago, I was invited to join a knitting group. I agreed to give it a try.
- B) My mother had taught me to knit at 15, and I knitted in class throughout college and for a few years thereafter. Then decades passed without my touching a knitting needle. But within two Mondays in the group, I was hooked, not only on knitting but also on crocheting (钩织), and I was on my way to becoming a highly productive crafter.
- C) I have made countless baby blankets, sweaters, vests, shawls, scarves, hats, mittens, caps for newborns. I take a knitting project with me everywhere, especially when I have to sit still and listen. As I had discovered in college, when my hands are busy, my mind stays focused on the here and now.
- D) It seems, too, that I'm part of a national renewal of interest in needle and other handicrafts (手工艺). The Craft Yarn Council reports that a third of women ages 25 to 35 now knit or crochet. Even men and schoolchildren are swelling the ranks, among them my friend's three grandsons. Last April, the council created a "Stitch Away Stress" campaign in honor of National Stress Awareness Month. Dr. Herbert Benson, a pioneer in mind/body medicine and author of The Relaxation Response, says that the repetitive action of needlework can induce a relaxed state like that associated with meditation (沉思) and yoga. Once you get beyond the initial learning curve, knitting and crocheting can lower heart rate and blood pressure.
- E) But unlike meditation, craft activities result in tangible and often useful products that can enhance self-esteem. I keep photos of my singular accomplishments on my cellphone to boost my spirits when needed.
- F) Since the 1990s, the council has surveyed hundreds of thousands of knitters and crocheters, who routinely list stress relief and creative fulfillment as the activities' main benefits. Among them is the father of a prematurely born daughter who reported that during the baby's five weeks in the intensive care unit, "learning how to knit infant hats gave me a sense of purpose during a time that I felt very helpless. It's a hobby that I've stuck with, and it continues to help me cope with stress at work, provide a sense of order in hectic (忙乱的) days, and allows my brain time to solve problems."
- G) A recent email from the yarn (纺纱) company Red Heart titled "Health Benefits of Crocheting and Knitting" prompted me to explore what else might be known about the health value of activities like knitting. My research revealed that the rewards go well beyond replacing stress and anxiety with the

satisfaction of creation.

- H) For example, Karen Hayes, a life coach in Toronto, conducts knitting therapy programs, including Knit to Quit to help smokers give up the habit, and Knit to Heal for people coping with health crises, like a cancer diagnosis or a family member's serious illness. Schools and prisons with craft programs report that they have a calming effect and enhance social skills. And having to follow instructions on complex craft projects can improve children's math skills.
- I) Some people find that craftwork helps them control their weight. Just as it is challenging to smoke while knitting, when hands are holding needles and hooks, there's less snacking and mindless eating out of boredom.
- J) I've found that my handiwork with yarn has helped my arthritic (患关节炎的) fingers remain more dexterous (灵巧的) as I age. A woman encouraged to try knitting and crocheting after developing an autoimmune disease that caused a lot of hand pain reported on the Craft Yarn Council site that her hands are now less stiff and painful.
- K) A 2009 University of British Columbia study of 38 women with an eating disorder who were taught to knit found that learning the craft led to significant improvements. Seventy-four percent of the women said the activity lessened their fears and kept them from thinking about their problem.
- L) Betsan Corkhill, a wellness coach in Bath, England, and author of the book *Knit for Health & Wellness*, established a website, *Stitchlinks*, to explore the value of what she calls therapeutic knitting. Among her respondents, 54 percent of those who were clinically depressed said that knitting made them feel happy or very happy. In a study of 60 self-selected people with persistent pain, Ms. Corkhill and colleagues reported that knitting enabled them to redirect their focus, reducing their awareness of pain. She suggested that the brain can process just so much at once and that activities like knitting and crocheting make it harder for the brain to register pain signals. Perhaps most exciting is research that suggests that crafts like knitting and crocheting may help to keep off a decline in brain function with age. In a 2011 study, researchers led by Dr. Yonas Geda at the Mayo Clinic in Rochester interviewed a random (随机的) sample of 1,321 people ages 70 to 89, most of whom were cognitively (在认知方面) normal, about the cognitive activities they engaged in late in life. The study, published in *The Journal of Neuropsychiatry & Clinical Neurosciences*, found that those who engaged in crafts like knitting and crocheting had a diminished chance of developing mild cognitive disorder and memory loss.
- M) Although it is possible that only people who are cognitively healthy would pursue such activities, those who read newspapers or magazines or played music did not show similar benefits. The researchers speculate that craft activities promote the development of nerve pathways in the brain that help to maintain cognitive health.
- N) In support of that suggestion, a 2014 study by Denise C. Park of the University of Texas at Dallas and colleagues demonstrated that learning to knit or do digital photography enhanced memory function in

older adults. Those who engaged in activities that were not intellectually challenging, either in a social group or alone, did not show such improvements.

O) Given that sustained social contacts have been shown to support health and a long life, those wishing to maximize the health value of crafts might consider joining a group of like-minded folks. I for one try not to miss a single weekly meeting of my knitting group.

36. When the author was a college student, she found that knitting helped her concentrate.

37. Knitting can help people stay away from tobacco.

38. Even men and children are now joining the army of knitters.

39. Being a member of a crafts group enhances one's health and prolongs one's life.

40. Knitting diverts people's attention from their pain.

41. The author learnt to knit as a teenager, but it was not until she was much older that she became keenly interested.

42. When people are knitting, they tend to eat fewer snacks.

43. Survey findings show that knitting can help people relieve stress.

44. According to a study, knitters and crocheters are less likely to suffer mild cognitive damage.

45. The products of knitting can increase one's sense of self-respect.

Section C

Directions: *There are 2 passages in this section. Each passage is followed by some questions or unfinished statements. For each of them there are four choices marked A), B), C) and D). You should decide on the best choice and mark the corresponding letter on Answer Sheet 2 with a single line through the center.*

Passage One

Questions 46 to 50 are based on the following passage.

Nobody really knows how big Lagos is. What's indisputable is that it's growing very quickly. Between now and 2050, the urban population of Africa could triple. Yet cities in sub-Saharan Africa are not getting richer the way cities in the rest of the world have. Most urban Africans live in slum (贫民窟); migrants are often not much better off than they were in the countryside. Why?

The immediate problem is poverty. Most of Africa is urbanizing at a lower level of income than other regions of the world did. That means there's little money around for investment that would make cities liveable and more productive. Without upgrades and new capacity, bridges, roads and power systems are unable to cope with expanding populations. With the exception of South Africa, the only light rail metro system in sub-Saharan Africa is in Addis Ababa, Ethiopia. Traffic jam leads to expense and unpredictability, things that keep investors away.

In other parts of the world, increasing agricultural productivity and industrialization went together. More productive farmers meant there was a surplus that could feed cities; in turn, that created a pool of labour for factories. But African cities are different. They are too often built around consuming natural

resources. Government is concentrated in capitals, so is the money. Most urban Africans work for a small minority of the rich, who tend to be involved in either cronyish (有裙带关系的) businesses or politics. Since African agriculture is still broadly unproductive, food is imported, consuming a portion of revenue.

So what can be done? Though African counties are poor, not all African cities are. In Lagos, foreign oil workers can pay as much as \$65,000 per year in rent for a modest apartment in a safe part of town. If that income were better taxed, it might provide the revenue for better infrastructure. If city leaders were more accountable to their residents, they might favour projects designed to help them more. Yet even as new roads are built, new people arrive. When a city's population grows by 5% a year, it is difficult to keep up.

46. What do we learn from the passage about cities in sub-Saharan Africa?

- A) They have more slums than other cities in the world.
- B) They are growing fast without becoming richer.
- C) They are as modernized as many cities elsewhere.
- D) They attract migrants who want to be better off.

47. What does the author imply about urbanization in other parts of the world?

- A) It benefited from the contribution of immigrants.
- B) It started when people's income was relatively high.
- C) It benefited from the accelerated rise in productivity.
- D) It started with the improvement of people's livelihood.

48. Why is sub-Saharan Africa unappealing to investors?

- A) It lacks adequate transport facilities.
- B) The living expenses there are too high.
- C) It is on the whole too densely populated.
- D) The local governments are corrupted.

49. In what way does the author say African cities are different?

- A) They have attracted huge numbers of farm labourers.
- B) They still rely heavily on agricultural productivity.
- C) They have developed at the expense of nature.
- D) They depend far more on foreign investment.

50. What might be a solution to the problems facing African cities?

- A) Lowering of apartment rent.
- B) Better education for residents.
- C) More rational overall planning.
- D) A more responsible government.

Passage Two

Question 51 to 55 are based on the following passage.

For the past several decades, it seems there's been a general consensus on how to get ahead in America: Get a college education, find a reliable job, and buy your own home. But do Americans still believe in that path, and if they do, is it attainable?

The most recent National Journal poll asked respondents about the American dream, what it takes to achieve their goals, and whether or not they felt a significant amount of control over their ability to be successful. Overwhelmingly, the results show that today, the idea of the American dream—and what it takes to achieve it—looks quite different than it did in the late 20th century.

By and large, people felt that their actions and hard work—not outside forces—were the deciding factor in how their lives turned out. But respondents had decidedly mixed feelings about what actions make for a better life in the current economy.

In the last seven years, Americans have grown more pessimistic about the power of education to lead to success. Even though they see going to college as a fairly achievable goal, a majority—52 percent—think that young people do not need a four-year college education in order to be successful.

Miguel Maeda, 42, who has a master's degree and works in public health, was the first in his family to go to college, which has allowed him to achieve a sense of financial stability his parents and grandparents never did.

While some, like Maeda, emphasized the value of the degree rather than the education itself, others still see college as a way to gain new perspectives and life experiences.

Sixty-year-old Will Fendley, who had a successful career in the military and never earned a college degree, thinks “personal drive” is far more important than just going to college. To Fendley, a sense of drive and purpose, as well as an effective high-school education, and basic life skills, like balancing a checkbook, are the necessary ingredients for a successful life in America.

51. It used to be commonly acknowledged that to succeed in America, one had to have _____.

- A) an advanced academic degree
- B) an ambition to get ahead
- C) a firm belief in their dream
- D) a sense of drive and purpose

52. What is the finding of the latest National Journal poll concerning the American dream?

- A) More and more Americans are finding it hard to realize.
- B) It remains alive among the majority of American people.
- C) Americans' idea of it has changed over the past few decades.
- D) An increasing number of young Americans are abandoning it.

53. What do Americans now think of the role of college education in achieving success?

- A) It still remains open to debate.
- B) It has proved to be beyond doubt.
- C) It is no longer as important as it used to be.

D) It is much better understood now than ever.

54. How do some people view college education these days?

A) It promotes gender equality.

B) It needs to be strengthened.

C) It adds to cultural diversity.

D) It helps broaden their minds.

55. What is one factor essential to success in America, according to Will Fendley?

A) A desire to learn and to adapt.

B) A strong sense of responsibility.

C) A willingness to commit oneself.

D) A clear aim and high motivation.

Part IV Translation (30 minutes)

Directions: For this part, you are allowed 30 minutes to translate a passage from Chinese into English.

You should write your answer on Answer Sheet 2.

泰山位于山东省西部，海拔 1500 余米，方圆约 400 平方公里。泰山不仅雄伟壮观，而且是一座历史文化名山，过去 3000 多年一直是人们前往朝拜的地方。据记载，共有 72 位帝王曾来此游览。许多作家到泰山获取灵感，写诗作文，艺术家也来此绘画。山上因此留下了许许多多的文物古迹，泰山如今已成为中国一处主要的旅游景点。

未得到监考教师指令前，不得翻阅该试题册！

Part I Writing (30 minutes)

(请于正式开考后半小时内完成该部分，之后将进行听力考试)

Directions: For this part, you are allowed 30 minutes to write a short essay on how to best handle the relationship between teachers and students. You should write at least 120 words but no more than 180 words.
